Thank you for taking the time to learn about our company Heat Design. As managing director, I am very pleased to present our 2016 / 2017 season collection and our latest BER trends with outside air. You will experience a wealth of tradition and style when you choose a Heat Design stove or fireplace. We are an Irish company that have been designing and manufacturing high quality stoves and fireplaces for over forty years, and we are passionate about our business.

Our product range is a result of concentrated research which has resulted in our cleanest burning, most efficient stoves yet. We design and build all our stoves and fireplaces with you in mind and our continuous product development means that our stoves burn less fuel, for longer, saving you money.

I hope this brochure will inspire you to consider purchasing a Heat Design product for your home.

Eoin O'Connor
Managing Director - Heat Design

PEACE OF MIND
Our stoves are designed and built to comply with the relevant CE standards, so you can rest assured that our stoves meet European health, safety and environmental protection legislation.

PROUD TO BE IRISH
For over forty years Heat Design, an Irish company, have been proud to design, engineer, test and deliver stoves to Irish homes.
Wood as Fuel – the green alternative

Burning wood in your Heat Design stove produces less net carbon emissions per unit of energy than any other domestic fuel. Fossil fuels such as coal, oil and gas evolve from natural materials that absorbed carbon dioxide from the atmosphere millions of years ago. When burnt, the carbon dioxide is released, leading to increased concentrations within the atmosphere.

The difference between wood and fossil fuels is one of time scale. Burning wood also releases carbon dioxide into the atmosphere. However, the same amount of carbon dioxide is absorbed by the tree, whilst growing over the previous few months or years, creating a balance between carbon emitted and absorbed. Therefore burning wood as a fuel is considered to be carbon neutral.

For the best effect, dry seasoned wood should be used. Wet wood may form creosote which will deposit in your chimney, resulting in maintenance of the chimney lining. Dry wood will provide more heat, and cause fewer problems than green wood.
Choosing the right stove

MINIMUM HEAT OUTPUT CALCULATOR
To calculate the amount of BTU’s (British Thermal Units) or kW needed to heat your room simply follow these three easy steps:

STEP 1:
Take the measurements of your room in feet or metres. Multiply: Length of room x Width of room x Height of room.

STEP 2:
Multiply this figure by a factor of 6 for BTU’s or 0.0606 for kW.

STEP 3:
This is the minimum heat output required to heat this room – now you can choose the right stove for your heat requirements.

SAMPLE ROOM CALCULATION

<table>
<thead>
<tr>
<th>Feet</th>
<th>Width</th>
<th>Height</th>
<th>Cubic Measurement x</th>
<th>Conversion Factor</th>
<th>Heat requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>20</td>
<td>20</td>
<td>9</td>
<td>3600ft³</td>
<td>6</td>
<td>21,600 BTU</td>
</tr>
<tr>
<td>Metres</td>
<td>6.1</td>
<td>6.1</td>
<td>102 m³</td>
<td>0.0606</td>
<td>6.18 kW</td>
</tr>
</tbody>
</table>

Therefore 21,600 BTU’s is the minimum heat output required to heat this room

*The above calculation should be used only as a guide – the heat output per room may vary depending on the room insulation, position of the room, the number of doors and windows and a number of other factors.

Hanover 44" surround in Marfil with a Vitae 6kW cassette stove
TR Multi Fuel Stoves

FEATURES

- Saves you money – uses only 25% of the amount of fuel used in an open fire
- CE approved up to 78.8% efficient
- Refuel less often
- Less ash means less cleaning
- Exceptionally clean airwash system
- Cleanburn technology with Tertiary Air
- The TR air distribution system ensures that fuel is burnt evenly and efficiently
- Fully constructed in high grade cast iron and heavy duty steel for long life
- Top or rear outlet flue
- Adjustable leg height

SAN REMO FREESTANDING MULTI FUEL STOVES

DRY MODELS: 4kW, 6kW, 12kW & 16kW
BOILER MODELS: 8kW, 12kW, 16kW, 25kW & 30kW

Our San Remo range of multifuel stoves are ideal for burning wood, coal and peat. With their classic styling they offer both first-rate efficiency and durability. By combining the best in high temperature glass with combustion technology our San Remo stoves feature crystal clear glass, for a better view of the flame.

Heat Design Irish Boiler Stove Range

Our boiler range is 100% Irish made with the finest of quality materials. With cast iron doors, these boilers are built to last. They offer a cost efficient alternative to the more traditional central heating system, whilst also providing an eye catching centrepiece in your home.

The Causeway Fire Door

If you have a back boiler, this door will convert your open fireplace into a closed fireplace. Adding the door will help you to control the burn rate of your fire, making it more efficient. It can increase efficiency by up to 40%.

FEATURES

- Easy to install into your existing fire with boiler
- Comes with an extension grate
- Baffle plate fixed mechanism. Baffle arrangement increases the efficiency of your back boiler
- Airwash system for clear glass and convection air out to the room
- Turns wasted heat into warmth for your home
- Saves money even when not lit by preventing heat loss up the chimney
- Suits most standard 16” or 18” fireplace openings
- Suitable only for back boilers
Insert Stoves

REDUCE YOUR CARBON FOOTPRINT

Our Heat Design Insert Stoves can be simply installed into a standard solid fuel fireplace opening, and can greatly increase the efficiency of your fire. Open fires can be as low as 20% efficient, with the majority of heat escaping up the chimney. Our insert stoves can deliver efficiency ratings of up to 80%, meaning that you burn less fuel and deliver fewer toxins into the environment.

FEATURES

- Reduce your carbon footprint – fewer toxins discharged into the atmosphere
- Reduces heat loss up the flue when unlit
- Full cast iron construction
- Airwash technology to keep glass clean
- Large ceramic glass door
- Easy removal for flue cleaning
- Fits into existing 16” & 18” standard fireplace opening
- Direct flue option

Heat Design Insert Boiler Stoves

The Vitae Glass Fronted Insert Boiler Stoves and the Heat Design Cast Iron Insert Boiler Stoves are efficient stoves that will fit perfectly into any standard fireplace. They offer a cost efficient alternative to the more traditional central heating system, whilst also providing an eye-catching centre-piece in your room.

**FEATURES**
- Save money - beat rising gas and oil prices
- High chrome grate for optimum fuel burn
- Suitable for outside primary air
- Airwash technology for clear glass
- Full cast iron construction and fits any standard fireplace
- Reduces heat loss up the flue when unlit
- Fewer toxins discharged into the atmosphere
- Large viewing glass
- Sleek design, glass fronted stove door (Vitae range only)

Vitae Cassette Stoves

Our Heat Design cassette stoves have been designed to create a stunning focal point in any room. They incorporate the latest technology that ensures they burn fuel with superior efficiency. So, as well as the attractive contemporary design, your Heat Design cassette stove will mean lower fuel costs, as more heat is delivered into your room.

**FEATURES**
- Extra large glass door creating a focal point in the room
- Sleek contemporary design
- Maximized heat output - preheated tertiary air system allows you to burn fuel with outstanding efficiency
- Crystal clear glass - airwash system helps to keep the glass clear
- First-rate efficiency - up to 83.8% of the fuel burned is turned into heat for your home
- Available with 3 or 4 sided frames
- Available with external air option

Mendip Stoves

Designs - whether traditional or modern - have been brought to life by the most experienced craftsmen using cutting edge technology. Mendip contemporary and traditional woodburning stoves are the perfect accompaniment for any home.

MENDIP 5 & 8 ENAMEL
Mendip 5 and 8 Claret Enamel stoves are a welcome and colourful contrast to plain matt black stoves. They embody all the qualities of a modern stove, powerful, clean burning, but with a fun modern colourful twist.

FEATURES
- Smooth Vitreous enamel finish (available in claret, ivory, black glossy and powder blue)
- Cast Iron Door and Top Plate
- Air washed glass
- Cast Iron Riddling system
- Adjustable legs
- Ceramic glass

LOXTON DOUBLE SIDED STOVE
The Loxton and Churchill 8 double sided stove is a fantastic feature for any room. Available as a standard height or raised logstore model. Mendip stoves double sided enables both doors to be opened so reloading can occur from either side of the stove. It’s ideal for an open plan room, or to heat two smaller rooms.

FEATURES
- Cast Iron doors (Loxton)
- Contemporary curved doors (Churchill)
- Air washed glass
- Unique single air controller
- Adjustable legs
- Ceramic glass
- Cast iron grate
- Closed combustion

Please browse through the Mendip brochure to view the extended range.

Westfire Stoves

When you think of Danish design and engineering, understatement comes to mind. Westfire capture this essence perfectly to manufacture wood-burning stoves with high quality craftsmanship and impeccable attention to detail. Simple cylindrical shapes and sleek insets work in traditional or modern interiors while pedestal and hearth stove designs stay minimal, with stunning accessories to enhance the look.

UNIQ 37
The Westfire Uniq 37 woodburning stove is a beautiful larger stove, slightly larger than other Westfire cylindrical models. It gives ample heat from the fire chamber through the three large glass windows. Designed with larger front glass and side glass panels provides a complete 180 degree fire view.

FEATURES
- Multi-point door locking system
- Air washed glass
- Ceramic glass
- 180 degree vision of the fire
- Full convection stove
- Finished in a metallic anthracite paint
- Two options (a storage door or pedestal)

LACUNZA COOKERS

A STUNNING FOCAL POINT IN YOUR KITCHEN
Lacunza have been manufacturing cast iron cookers for the European market for over 50 years. During this time they have built a reputation for impeccable design, quality and durability. We are delighted to bring this beautiful and unique cooker to the Irish market. Your Lacunza cooker will allow you to bake, fry, grill, slow cook, roast or boil like a pro.

**FEATUERES**
- Large capacity firebox for less frequent loading of logs
- Premium grade cast iron construction
- Choice of black or ivory enamel finish *(7TE5 not available in ivory)*
- Oven tray and racks included
- Cast iron hotplate with insulated hinged covers

Choosing the right fireplace

A fireplace becomes the focal point of any room, so choosing the right fireplace is essential in creating an atmosphere of warmth and style in your home. With a wealth of experience in fireplace design and manufacture, we are passionate about our expertly crafted fireplaces and offer an extensive range of traditional and contemporary fireplaces in a range of finishes. When choosing your fireplace, there are a number of considerations to take into account.

CONSIDERATIONS

• The type of heating system: solid fuel, gas or electric
• The overall look you wish to achieve: traditional vs contemporary
• The available width and height for the fireplace
• The type of material you wish to choose: limestone, marfil, crema marfil, perla white, ivory pearl, granite, wood
• The care and maintenance required

Caring for your fireplace

Natural stones, marbles and granites are materials naturally formed over millions of years. They have very individual features and characteristics. Each piece is hand crafted to show these natural materials at their best and will form the centrepiece in your home.

Your fireplace surface requires a minimum of maintenance to keep it looking as good as new. Dust down regularly with a soft, clean brush and occasionally wipe over with a damp cloth. Consideration should be given to the placement of heavy ornaments. As with all natural materials, exposed areas may fade in strong sunlight. Your natural stone fireplace is quite durable and has been treated with a sealer to help protect and maintain the surface. In the event of an accident, soak up spillages immediately. Buff with a soft, dry cloth. In the event of staining, contact your local stone mason for a specialist cleaning kit.

*Any fret can be used along with the Neptune trim to fit either an open fronted gas convector fire or a high efficiency glass fronted gas convector fire. The Neptune trim is available in brushed steel, stainless steel or antique brass.
VISION RANGE
Unique collection of specially designed fire frames which can be fitted with any model of fire and even changed at a later date if required. Complete with unique Ezi-slide control, putting instant control right at your fingertips.

GAS FIRES BALANCED FLUE
VISION TRIMLINE RANGE
The Vision Trimline range of fires are skilfully engineered to allow a true trimless aspect. This means no distracting frames or visible mechanical workings – just fire. All models are balanced flue for optimal efficiency and are available in either natural gas or LPG.

OPTIONAL EXTRAS
- High Definition Logs (standard) with Lamel Chamber
- Basalt with Black Gloss Mirror Chamber

Thermostatic Remote Control comes as standard with all Vision Trimline Fires. WiFi capability for extra control.

*Please view table on previous page for more technical information

CALLISTO
Available in Chrome and Antique brass finishes.

EOS
Available in Chrome and Antique brass finishes.

EQUINOX
Available in Chrome, Antique brass and Black finishes.

PROVIDENCE
Available in Chrome and Antique brass finishes.

Please browse through the Vision Trimline brochure to view the extended range.
**InfInITY RAnGE**

A stunning range of gas fires with a contemporary European look. Warmth, with infinite style and vision, the range boasts a wide choice of sizes, styles and finishes to fit perfectly in your home. Many models are balanced flue for optimal efficiency and are available in either natural gas or LPG.

**INFINITY FRAMELESS FIRES COME WITH A CHOICE OF LINER**

Electric Fires

Our range of electric fires are a perfect alternative to gas or for those looking for another heating option. They are easy to install, 100% efficient and are versatile so can be fitted almost anywhere in the living space.

Options: Brass trim with brass fret or chrome trim with chrome fret.
Heat Design provides an extensive range of flue components suitable for solid fuel applications including single wall, twin wall and flexible flue solutions. Our products are extensively tested, and manufactured to the highest quality standards, providing a flexible and reliable solution for your flue system.

**PLEASE ENQUIRE ABOUT THE CORRECT FLUE COMPONENTS FOR YOUR STOVE**

**SINGLE WALL FLUE**

**TWIN WALL FLUE**
Available in Silver & Black

**FLEXI FLUE**

**VITREOUS ENAMEL**

For further information on our complete range of flue solutions, please request our brochure from your local retailer or visit www.heatdesign.ie
Skamolex panels are ideally suited for lining stoves, fireplaces and gas fires and are capable of withstanding temperatures of up to 1100°C. They are made from exfoliated vermiculite and are non-irritant, odourless and clean to handle.

### BENEFITS

- High insulation capacity = better performing stove
- Environmentally friendly - better combustion + cleaner waste gasses
- Ideal for fire chambers and inglenooks
- Ideal as a heat shield above a free standing stove
- Easy to use and cut to required size

### PANEL DESIGNS

Skamolex panels are available in six standard patterns, ranging from traditional masonry look to three designs matching the trends of current fires and stoves. Available in:

1. 1000mm x 610mm x 20mm
2. 1000mm x 1260mm x 20mm (Brickwall only)
3. 1000mm x 610mm x 25mm VIP-900 Plain Skamolex. Ideal for replacing internal stoveboards

#### Fire Classification

- **Max Service Temperature**: 1000°C
- **Thermal Conductivity**: 0.06W/mK at 200°C
- **Compressive Strength**: 2.6N/mm²
- **Bulk Density**: 225kg/m²
Skamotec 225

**FIREPLACE BUILDING BOARDS**
The exceptional heat resistance makes Skamotec 225 able to withstand continuous heat cycles, and the low thermal conductivity provides maximum insulation, making it the ideal product when building a fireplace.

**TOTAL FIRE PROTECTION**
Skamotec 225 is a non-combustible material, providing total fire protection for residential and commercial buildings.

**HEAT CONTROL**
Skamotec 225 allows you to take control of the heat surrounding the fireplace – with its excellent R-value and low thermal conductivity, heat loss can be reduced. Skamotec 225 uses the heat by redistributing it to other areas of the house, saving money.

**QUICK AND EASY INSTALLATION**
Skamotec 225 can be easily cut and handled using common wood working tools, and the fact that it is 50% lighter than other non-combustible boards makes it easy to handle and shape. It can be used as both light weight construction and as wall-covering because of its strength, and so combines multiple building products into one. The pictures below show an example of the simplicity of building a fireplace with Skamotec 225.
**Promafour**

**PROMAFOUR® THE COMPLETE SYSTEM FOR FIREPLACES OR STOVES**

Using PROMAFOUR®, you can insulate and finish your fireplace or stove the way you want, without compromising safety, comfort or design. Used with open fireplace, wood, gas, or pellet stoves – the flexible PROMAFOUR® system is suitable for all types of fireplaces or stoves and ensures no unwanted heat loss. Additionally, PROMAFOUR® is quick and easy to install with standard tools, so you don't have to buy special materials.

**THE ADVANTAGES OF THE PROMAFOUR® SYSTEM**

- Security and reliability
- Aesthetics and comfort
- Durability and strength
- Quick and easy assembly

1. **PROMAFOUR® CONSTRUCTION BOARDS**
   - Solid, noncombustible construction boards
   - Can resist to temperatures up to 1000°C
   - Excellent mechanical strength
   - Quick and easy installation

2. **PROMAFOUR®-STUDS**
   - Noncombustible, cut-to-size profiles

3. **PROMASIL®-1000L INSULATION BOARDS**
   - Lightweight, refractory insulation boards
   - Excellent insulation properties
   - Can resist to temperatures up to 1000°C
   - Exceptional thermal & mechanical properties

4. **PROMAFOUR®-HTI 1100 BLANKETS**
   - Flexible insulation blankets
   - Based on high temperature glass fibers
   - Noncombustible
   - Can resist to temperatures up to 1000°C

5. **PROMAFOUR®-PRIMER**
   - Noncombustible, vapour permeable primer

6. **PROMAFOUR®-GLUE 1000**
   - Refractory glue
   - Can resist to temperatures up to 1000°C
   - Adheres very well to all materials

7. **PROMAFOUR®-HT JOINTFILLER**
   - High temperature resistant filler
   - Can resist to temperatures up to 1000°C
   - Ideal for filling in and smoothing joints, screw and staple holes and unevennesses glue
